Ready, Set, Flow!

As the nation continues to learn more about the novel Coronavirus, businesses such as restaurants, hotels, retail stores and many more are gearing up for what may be called a "new normal." Restrictions are being loosened and phasing is pushing forward, dictating a demand for supplies that will need to be installed or repaired for re-openings. Krowne is well prepared for this surge and expects to see an influx in demand for kitchen faucets, gas connectors, hand sinks and public restroom related products.

Check out how Electronic Sensor Faucets Help Reopen America

Staying Sanitary with Self-Closing Faucets

Krowne self-closing metering faucets are a great option for retrofits and help

eliminate the spread of harmful pathogens. While they are not entirely touchless, metering faucets significantly reduce the risk of spreading germs as they require no need to be touched following the washing of hands. Krowne offers both single hole and 4-inch center options that are budget-friendly for upgrading public lavatories. Self-closing faucets can be adjusted to the required specification with water flow times between 5 and 20 seconds. Stay sanitary and save water with a Krowne faucet today.

Upgrade your establishment today

Upgrade now to a Krowne HS-11 Hand Sink with Sensor Faucet

Stay ahead of the curve and avoid a costly retrofit with a Krowne HS-11 Hand Sink that comes equipped with a single hole Electronic Sensor Faucet. These Hand Sinks also allow for soap and towel dispenser options to create the ideal hygienic hand wash station for employees and customers. Additional hand wash stations are available in 16", 12", and 9" wide varieties.
